Regulars at the Slimming Lab of The Aivee Institute had already been asking about [Onda Coolwaves](#) even before the machine’s official launch. There were a few regulars, Aivee Leaguers, as they are more fondly called,

who've taken the newest slimming miracle for a spin. "It's more intense than most treatments because you only need to do it once a month,"  says an actress. She also suggests three sessions before summer kicks off. "It actually feels like a deep tissue massage," another regular of the clinic observes. "When the hand piece touches skin, it's cold but then after a while the deeper layers of your skin begin to feel warm. That's when you know it's working."

The Aivee Onda Coolwaves is a revolutionary non-invasive slimming treatment that works three ways 🐦 . “It is a complete body contouring treatment that targets skin tightening, as well as cellulite and fat reduction all in one device,” 🐦 says the Aivee Group. The new machine works using Coolwaves technology, which is an evolved variant of microwaves. The innovation targets fat cells so that it can reduce fat deposits in common problem areas such as stomach, thighs, arms, bra line and flanks. The machine is also designed to stimulate collagen production which helps in contouring, firming and shaping the body.

A smart hand piece distinguishes Onda Coolwaves. “It is designed for deep and shallow usage depending on the area. A system of LED guides the operator to ensure maximum safety and effectivity,” explains the Aivee Group. Through the hand piece, Onda Coolwaves is able to control the amount of energy used on specific body parts. An integrated cooling system ensures soothing comfort while simultaneously heating fats in the deeper layers of skin.

Onda Coolwaves renders results almost immediately and can be done on the arms, inner and outer thighs, abdomen, bra line and flanks. For optimum results, it is advised that treatments be done once a month or every two weeks. Treatments take 20-30 minutes and have absolutely no downtime.

Aivee Onda is available at The A-Institute, 3F Burgos Park Building, Forbestown Road, BGC Taguig. For more information, click [here](#).
